

MIGUEL RAMOS

FRONTEND / WEB DEVELOPER | React • TypeScript • JavaScript • Vue.js • Angular

Melbourne, VIC, Australia | [+61 403 747 520](tel:+61403747520) | m.ramos.guaty@gmail.com | linkedin.com/in/miguelramosg | github.com/viejoquatv

PROFESSIONAL SUMMARY

Frontend Developer with 8+ years of professional experience building and maintaining production web applications, e-commerce experiences and hybrid applications. Strong background in React, TypeScript, JavaScript, Vue.js and Angular, with hands-on experience in reusable component development, unit and E2E testing, API integration, responsive interfaces and frontend refactoring. Combines software development experience with a Graphic Design background to deliver user-focused interfaces with strong visual consistency and usability. Based in Melbourne, Australia.

TECHNICAL SKILLS

- ❖ **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3/Sass.
- ❖ **Frameworks & Libraries:** React.js, Next.js, Vue.js, Angular, Redux, Tailwind CSS.
- ❖ **Build Tools & Workflow:** Git, GitHub Actions, Webpack, REST APIs, GraphQL, Microservices, Responsive Design, Reusable Components
- ❖ **Testing** Unit Testing • E2E Testing
- ❖ **CMS & E-Commerce:** Shopify (Liquid), Drupal 7/8/9, WordPress
- ❖ **Design** Adobe Creative Suite • Photoshop • UI-focused development

PROFESSIONAL EXPERIENCE

JETSTAR AIRWAYS | Melbourne, VIC, Australia

Technical Data & Digital Records Controller | Jul 2023 – Present

- Administering and updating electronic document and records management systems (EDRMS), internal cataloging platforms, and web intranet portals to optimize data indexing, retrieval, and version control.
- Reviewing, auditing, and indexing digital release certificates and technical logs into centralized databases, ensuring high data integrity and zero error margins under regulated compliance standards.
- Managing component traceability databases, maintaining classification records, serial number tracking, and automated batch history files for critical engineering assets.
- Executing internal database quality audits to identify data discrepancies, conducting gap analysis, and coordinating digital system updates across engineering and operations teams.
- Responding to technical data requests and extracting analytics/statistics from central record systems for nationwide airbase operations.

ZAGALABS — Front End Developer | Colombia | Jul 2016 – Mar 2023

80 Acres

- Developed and maintained user-facing interfaces and interactions for the 80Acres product using Vue.js and TypeScript.
- Built reusable components and interfaces to display event-driven experiences across different application instances.
- Integrated multiple application instances to simplify data access and enable data consumption across different platforms.
- Implemented conditional data flows for GET and POST operations and developed shared components for reuse across the application.
- Added unit tests to selected components to improve reliability and maintainability.
- Defined dynamic import structures and service-pattern based configuration communication to support flexible application behaviour.

TodayTix

- Developed and maintained user-facing interfaces using React and TypeScript.
- Built reusable components and interfaces for event-based experiences across multiple product instances.
- Implemented conditional data flows for GET, POST and PUT operations and shared components within a monorepo.
- Added unit tests to improve component reliability and maintainability.
- Worked with dynamic imports and service-pattern based configuration.

PuppySpot

- Developed React and TypeScript interfaces for an administrative product handling puppy-related forms and information.
- Built reusable components and integrated multiple platforms including PET, BreederHub and Kennel.
- Implemented and maintained E2E testing and component-level unit testing.
- Updated data flows for GET, POST and PUT operations and maintained shared components.

Zooka Reader

- Refactored the reader framework from AngularJS to ReactJS.
- Designed a dynamic module import structure and configuration communication based on microservices patterns.
- Integrated Drupal service payloads and AJAX data flows to support flexible reader configurations.
- Worked on a complex hybrid application supporting multiple configuration use cases.

Grassroots Coop / J&J; Acuvue

- Built and maintained customised Shopify storefront experiences using Liquid, JavaScript, Sass and Theme Kit.
- Developed and updated reusable Liquid modules to match designer specifications and support purchase flows.
- Maintained product detail pages and shopping flows and integrated third-party app modules.
- Applied BEM methodology and Sass for scalable styling and frontend consistency.

Berrysafe / Encyclopedia / OceanX / Portal

- Developed customised Drupal-based frontend experiences using Drupal 7/8, Twig, Bootstrap, Sass, JavaScript, jQuery and PHP variables.
- Integrated APIs and external services, including a WhatsApp integration for customer communication.
- Built interfaces for insurance, education, analytics and e-commerce products.

VML — Front End Developer | Colombia | Nov 2013 – Jul 2016

- Developed new user-facing web features and reusable frontend code.
- Determined page structure and design implementation while working with HTML, CSS and frontend technologies.
- Optimised page loading performance and maintained web experiences.
- Collaborated on frontend development and implementation of user-facing digital experiences.

EDUCATION

- **Advanced Diploma in Information Technology** — Greenwich College, Melbourne, Australia | *Expected Completion: 2027*
- **Diploma in Information Technology** — AIT College, Melbourne, Australia | Completed
- **Bachelor's Degree in Graphic Design** — Escuela de Artes y Letras, Colombia | 2012 – 2015
- **Certificate in Graphic Design** — Fundación Universitaria San Mateo, Colombia | 2007 – 2009

ADDITIONAL

Languages: Fluent English • Native Spanish • Basic Italian & French
